

A NEW BREED OF DOCTOR AND AMERICA'S NEWEST HEALTH CRUSADER

DR. BARILE

Through the course of each month, there will appear two major articles on a new and different concept about Health Care in this country. It is no secret that we have a society of chronically sick people in this nation, brought about by a philosophy that TREATING symptoms, with drugs, is better than correcting the CAUSE of why you are sick in the first place. I have spent well over half my life caring for the sick and speaking out about the hazards of prescription and over-the-counter drugs. I have been in clinical practice for 45 years and the stand I take is very clear ... drug therapy has NO PLACE in Health Care, but it does have a place in emergency, first aid care and the of saving lives.

Let me give you somewhat of a personal background on myself and what prompted me to become a DRUG FREE Health Care Provider.

At the age of 5 years, I developed a respiratory condition that was diagnosed by a Medical Doctor as bronchitis. That was in 1935. My parents knew nothing about Alternative Care. All they knew as Medicine. I was taken to a Medical Doctor, examined, and given a prescription (DRUGS). I did that for 23 years until age 28. I NEVER got well! In fact, I was worse. I bordered on Asthma. It was very difficult to breath at times. To make this story short (however, the full case history is in the first chapter of my book), it got to a point that one week a month I was out of work. I was married with a family and had trouble paying my bills. It was at that point I took charge of my health and sought out a different approach that was DRUG FREE. THIS doctor did a different type of exam. After a short period of time, he told me what was causing my many years of needless suffering. I decided to follow his program of removing interference, diet and lifestyle changes and whole food and herbal supplements. NO DRUGS! Well, over the next eight months (not 23 years!), I got well and you know what? I never went back to that sick body ever again. From that point on, the rest is history. I spent the next six years in college, along with some 20,000 hours of post-graduate studies, until today, at 78 and now have 45 years of clinical practice. I have vibrant health and abundant energy! The question is why not you? In 1958, that doctor gave me a free consultation and exam, because of that service and getting well, for the last 45 years I too offer a free consultation and preliminary exam. If you are not getting the results you expected under your present medical care, or you remain sick, get a second opinion! If I can't help you, I will refer you to someone who can. Call me personally @ 813-431-8226 or 1-800-726-WELL (9355). Let's see what I can do for you, like I did for myself. My next column will appear in two weeks.
